

Har Agam Deep Singh

haragam.22@gmail.com | +91 70177 44734 | New Delhi, India – 110001 | [LinkedIn](#) | [GitHub](#)

PROFILE

Second-year B.Tech student specializing in Machine Learning, Generative AI, and backend systems, with hands-on experience building multi-agent RAG pipelines, autonomous AI frameworks, and production-grade ML applications. Actively seeking an AI/ML or Generative AI internship to apply research-driven engineering skills to real-world problems.

EDUCATION

Maharaja Agrasen Institute of Technology (GGSIPU), New Delhi

B.Tech in Computer Science & Engineering | CGPA: 8.46 | 2024 – 2028

LEADERSHIP & TECHNICAL EXPERIENCE

BYTE Society | Backend & ML Developer | Sep 2024 – Present

- Engineered the backend for a real-time 1v1 competitive coding platform using Python and FastAPI, supporting live judge execution, leaderboard updates, and 50+ concurrent users.
- Collaborated with the ML team to analyse and translate complex NLP and deep learning research papers into functional, production-ready code.
- Spearheaded 3+ major technical events including an algorithmic trading competition and Pixel Punk game jam, coordinating cross-functional teams of 20+ members.

PROJECTS

Devlens | Backend Lead | Mar 2026 | [GitHub](#)

- Built an AI codebase navigator using deterministic AST parsing and hybrid vector search, mapping 500+ code dependencies and GitHub issues across multi-language repositories.
- Engineered a transformer-based agentic backend with multi-lingual, stateless context injection to explain architectural intent using OpenRouter and LLMs, reducing onboarding time by ~60%.

Jal Drishti | ML Lead | Jan 2026 | [GitHub](#)

- Architected a real-time computer vision underwater surveillance system using YOLOv8 and FUnIE-GAN, achieving 89%+ mAP on threat detection across 5 object classes.
- Designed a dual-mode backend leveraging WebSockets for low-latency (<80ms) telemetry and multi-stream video processing.

DebateMind | Backend & ML Dev | Nov 2025 | [GitHub](#)

- Engineered an autonomous AI debate framework using Reinforcement Learning to optimise LLM reasoning, backed by a real-time RAG pipeline for semantic recall and fact-checking.

ClauseCraft AI | Project Lead | Aug 2025 | [GitHub](#)

- Built a multi-agent AI policy navigator using retrieval-augmented generation (RAG) and a deterministic NLP validation engine, reducing manual eligibility-check time by ~70% and processing 10+ policy documents simultaneously.

Data Wiping Tool (DropDrive) | Backend Research | Sep 2025 | [GitHub](#)

- Developed a MERN stack data-wiping application with C++ logic implementing secure NIST SP 800-88 standards; shortlisted in Smart India Hackathon (SIH).

SKILLS

Languages: Python, C++

AI / ML: PyTorch, Deep Learning, Reinforcement Learning, NLP, Computer Vision, LLM Fine-tuning, RAG, Multi-agent Systems, Generative AI, Transformers, Prompt Engineering

Backend & Cloud: FastAPI, Django, Docker, AWS EC2, Vector Databases, WebSockets, REST APIs

Tools & Platforms: Git, MCP Servers, GitHub, Data Analysis, Open Source Contribution

CERTIFICATIONS

Machine Learning Specialization – Andrew Ng, Deeplearning.ai | Feb 2026 | [View Certificate](#)

Generative AI with LLMs – Deeplearning.ai | Dec 2025 | [View Certificate](#)

CS50P – Programming with Python – Harvard University | Dec 2024 | [View Certificate](#)

ACHIEVEMENTS

- Winner, Smartohack 3.0 – R&D Department MAIT | Mar 2026 (Jal Drishti: underwater object detection system)
- 1st Runner Up, VisionX Hackathon – GeeksforGeeks / HackBriven | Mar 2026 (Devlens: open-source journey tool)
- Winner, Verdict – Cognizance, IIT Roorkee | Jan 2025 (National-level debating competition)
- Winner, Founder's Gambit – E-Summit, IIT BHU | Feb 2024 (National-level business competition)
- 1st Runner Up, Research Quest – Research Society MAIT | May 2025 (Research proposal methodology & clarity)
